

### THE LOUD HOUSE

One of the more distinctive bumps along the city's skyline is the puffy white roof of the Syracuse University Carrier Dome, the only domed stadium of its kind in the northeast United States or on any college campus in the country. Built in 1980, the 50,000-seat dome gives a huge home-team advantage to the school's basketball, football, and lacrosse teams and plays host to major concerts and community events — all of which have attracted millions of visitors over the years to the central New York area. — *Jeffrey A. Charboneau*
